EXPERIENCE

Full Stack Developer

Croydon Colombia

-  11/2023 - Present
-  Bogotá
- Development and maintenance of REST APIs with Java (Spring Boot) and .NET
 - Implementation of clean architecture to improve scalability and maintainability
 - Integration with databases such as MySQL, MongoDB, and Redis
 - Optimization of code structures, reducing complexity in critical modules
 - Documentation of services using Swagger and version control with Git
 - Ongoing support and feature improvement in an Angular front end
 - Exploration and integration of Artificial Intelligence components in development workflows

Instructor - Collaborative Projects Development in Python

Unad

-  2026
-  Colombia
- Lecturer on version control and teamwork
 - Use of Git and GitHub in collaborative projects
 - Best practices in software development

EDUCATION

Bachelor's Degree in Systems Engineering

UNAD

-  2025
-  Colombia (in progress)

Technologist in Systems Analysis and Development

SENA

-  01/2018 - 12/2020
-  Colombia
